

Class 4 English: The Thirsty Crow

One hot summer day, a thirsty crow was looking for water. He flew all over the fields but could not find any water.

After a long time, he saw a pitcher under a tree. He flew straight down to see if there was any water inside.

Yes, he could see some water inside the pitcher! But the water level was very low. The crow tried to push his head into the pitcher, but the neck of the pitcher was too narrow.

He looked around and saw some pebbles on the ground. He got an idea. He picked up the pebbles one by one and dropped them into the pitcher.

As he dropped more and more pebbles, the water came up to the top. The crow drank the water and flew away happily.
