

Class 2 Maths: Addition and Subtraction

Addition means putting things together. When we add two numbers, we get their sum.

For example, if you have 3 apples and your friend gives you 2 more apples, you have 5 apples in total.
 $3 + 2 = 5$.

Subtraction means taking things away. When we subtract one number from another, we find the difference.

For example, if you have 5 candies and you eat 2 candies, you are left with 3 candies. $5 - 2 = 3$.

Addition and subtraction are inverse operations. If $3 + 2 = 5$, then $5 - 2 = 3$.
